

Reis Eurosystems announces

Coin Counting Machines CC 1102 CC 1104

Simple counting techniques

Basic coin counters from REIS Eurosystems.

These products represent a very cost effective concept for coin counting. The CC 1102 and CC 1104 count pre-processed coins.

Used for coin counting, separating, bagging and packaging.

Technical specifications

- Dimensions:
 - CC 1102: (H 185 mm, W 240 mm, D 400 mm)
 - CC 1104: (H 360 mm, W 240 mm, D 400 mm)
- Weight: CC 1102: 8 Kg
CC 1104: 12.5 Kg
- Power supply: 110/60 Hz or 220 V/50Hz
- Power consumption: CC 1102: approx 60 w
CC 1104: approx 65 w
- Counting speed: CC 1102: approx 2000 cpm
CC 1104: approx 2500 cpm
- Max. no. of coin denominations: 10
- Count display: 5 digits
- Batch display: 4 digits
- Count mode: Normal count or batch count
- Coin diameters: from 14 to 34 mm
- Coin thickness: from 1.0 to 3.4 mm (model specific)
- Noise level: approx 78 dB (A)
- Hopper capacity: CC 1102: 1500 coins
CC 1104: 4300 coins
- Connectivity: for optional foot switch & remote display

Highlights

- Variable batch setting from 1-9999 (for bagging or wrapping).
- Simple adjustment for the coin's diameter and thickness.
- Coins of >0.5 mm smaller diameter are automatically off-sorted.
- CC 1102 carry handle for easy portability to multiple locations.
- Protection lid also acts as an inspection tray for funneling coins into the coin hopper on CC 1102.
- Motorised coin feed on CC 1104.
- Slim and compact space-saving design of strong, lightweight metal alloy protected by durable moulded covers with a large base for stability.
